JATIN KUMAR

Cybersecurity Analyst | SOC | Vulnerability Assessment & Penetration Testing (VAPT)

Delhi, India | +91 79822 79951 | jk016791@gmail.com | linkedin.com/in/jatin0011

PROFESSIONAL SUMMARY

Cybersecurity analyst with hands-on internship experience in vulnerability assessment, penetration testing, SIEM-based security monitoring, and incident response. Published peer-reviewed researcher on Zero Trust Security Architecture. Skilled in vulnerability management, log analysis, and threat detection using industry-standard tools (Nessus, OpenVAS, Burp Suite, Nmap, Wireshark). Seeking an entry-level SOC Analyst / VAPT role to apply practical security operations and testing skills.

CORE SKILLS & KEYWORDS

- Security Operations: SOC Monitoring, SIEM Log Analysis, Alert Triage, Incident Response, Threat Detection, Threat Intelligence
- Offensive Security: Vulnerability Assessment, Penetration Testing (VAPT), Web Application Security, OWASP Top 10, Network Scanning
- Tools: Nessus, OpenVAS, Burp Suite, Nmap, Wireshark, SIEM Platforms, Metasploit (working knowledge)
- Frameworks & Concepts: MITRE ATT&CK (familiar), Zero Trust Architecture, IAM, Micro-segmentation, IDS/IPS, CVE Research, Vulnerability Management
- Forensics: Digital Forensics, Packet Inspection, Log Analysis, Evidence Collection
- Languages/Scripting: Python, Java, MySQL, Bash/Shell Scripting
- Operating Systems: Linux (Kali, Ubuntu), Windows Server

PROFESSIONAL EXPERIENCE

Junior Cybersecurity Analyst – Intern | HackTech *Jun 2025 – Jul 2025*

- Performed vulnerability assessments and penetration testing across client web applications and network infrastructure; documented findings by risk level (High/Medium/Low) for remediation planning.
- Monitored security events using SIEM tools, performing log analysis, alert triage, and suspicious network behavior investigation as part of daily SOC operations.
- Assisted in incident response and digital forensic evidence collection during active security investigations.
- Collaborated with senior analysts to research emerging threats and recommend remediation strategies, contributing to reduced attack surface exposure across monitored environments.

PROJECTS

Enterprise Automated Vulnerability Scanner — Personal / Academic Project (2024 – Present)

- Designed a Python-based modular vulnerability scanning framework integrating Nessus, OpenVAS, Burp Suite, and Nmap with automated scheduling, vulnerability correlation, and multi-format reporting (PDF, CSV, JSON).
- Built JIRA/ServiceNow-compatible ticketing hooks to auto-create tickets from scan findings, cutting manual handoff time in the vulnerability remediation workflow.

CTF (Capture the Flag) Competitor — HackTech @ Amity University (2024)

- Solved challenges across reverse engineering, web exploitation, cryptography, and OSINT, strengthening practical penetration testing skills under time-pressured conditions.

PUBLICATION

- "Zero Trust Security Model in Cybersecurity Today: Architectures, Operations and Implementation Strategies" — IJIRT, 2024 (Peer-reviewed). Covered IAM integration, micro-segmentation, attack surface reduction, and enterprise Zero Trust architecture patterns.

EDUCATION

Master of Computer Applications (MCA), Specialization: Cybersecurity | Amity University, Gurgaon *2024 – Present*

Bachelor of Computer Applications (BCA) | Chandigarh University, Mohali *2021 – 2024*

CERTIFICATIONS

- Digital Forensics Essentials (DFE) — EC-Council, 2024
- The Complete Python Course — Infosys Springboard, 2023
- Introduction to Industry 4.0 & Industrial IoT — NPTEL, IIT Kharagpur, 2022

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native) | Availability: Open to on-site, hybrid, and remote entry-level cybersecurity roles across India (immediate joiner)
